**HIGH VOLTAGE
LESS SYSTEM COST**

With a maximum system voltage of 1500 volts, the next generation YGE 1500V Series Modules reduce balance-of-system costs and increase system-level energy yield in large-scale power plants.

Costing Saving

As YGE 1500V Series modules are allowing more modules per string the balance-of-system costs are reduced by less required combiner boxes, fuses and cables in large-scale projects.

Increased Energy Yield

By the higher system voltage line losses in cabling are reduced and the inverter efficiency is increased. This results in an up to 2% higher yield.

PID Resistant

Tested to the industry's most rigorous durability standards, YGE 1500V Series modules are PID-resistant in accordance to IEC 62804. To ensure PID-resistance at higher system voltages, these cells receive an extra layer of protective silicon nitride.

Advanced Glass

Our high-transmission glass features a unique anti-reflective coating that directs more light on the solar cells, resulting in a higher energy yield.

Yingli Green Energy

Yingli Green Energy Holding Company Limited (NYSE: YGE), known as "Yingli Solar," is one of the world's leading solar panel manufacturers with the mission to provide affordable green energy for all. Yingli Solar makes solar power possible for communities everywhere by using our global manufacturing and logistics expertise to address unique local challenges.
