HIGH VOLTAGE

LESS SYSTEM COST

With over two decades of manufacturing experience and millions of PV systems installed worldwide you can trust that our product quality and long term reliability have been proven in the field.

Costing Saving

As YLM 1500V modules are allowing more modules per string the balance-of-system costs are reduced by less required combiner boxes, fuses and cables in large-scale projects.

Increased Energy Yield

Increasing to a 1500V system voltage reduces the line losses in cabling and also allows inverters to operate with improved efficiency. The benefits can add up to 2% higher yields.

Higher Durability

The multi-busbar design can decrease the risk of cell micro-cracks by improving long-term mechanical performance

Advanced Glass

Our high-transmission glass features a unique anti-reflective coating that directs more light onto the solar cells, resulting in a higher energy yield.
